- Our ref. to "acceptability" is confusing and too-low of a bar!
- Concern about continuity of PM's commitment.
  -> regulation
- 'Regul. approval' is a hot button
- 10% because of sc. merit, not US source
- what supports final rec is a measure of exposure ? -> slide
- change "per cig." to "per cig. smoked (under x cond.)"
- Short-term low shisky topogr. may be artificial (e.g. puff interval)
  -> can this be used for non-low programming?
- Send Bill copy of the SDS
- George's slide 'Model': modify re nicotine?
- Strengthen why certain measures of exposure were used (SDS)
- Develop suggestion how to measure addiction
- Advanced planning to generate/receive pres. did not work (only with Ted)
